

Extra features we have

- ☒ A **well-developed shopping cart**.
 - checkout all orders in cart
 - dynamically display the number of products in cart on menu bar
 - add/remove any items to/from the cart
 - prices will change based on user actions (e.g., remove items, add items)
 - users can add items to the cart without logging in, and the cart will remember the items in it after logging in.
- ☒ Search bar in home page.
 - search products by categories
 - search products by product titles
 - search products by descriptions
- ☒ A **full-featured order page**.
 - search bar --- locate any order by item name
 - view detail of any orders
- ☒ Build-in data
 - use **signals** to make sure our MiniAmazon system has some build-in data(e.g. initial items, default user), easy to deploy
- ☒ Product category.
 - Search by category of products, can switch between them in the home page
- ☒ Associate your amazon account with your UPS account.
 - automatically associate each order with your UPS account
- ☒ User-friendly UI and interaction.
 - all edit info page will have some error handling, will show the error message if failed
